EDUCATION:

Western Michigan University | Kalamazoo, MI — **Expected Graduation: May 2028**
BBA, **Major:** Business Analytics; **Minor:** Supply Chain Management — **CGPA: 3.56**

SKILLS:

- **Analytics & AI:** Power BI, Excel, PowerPoint, Data Visualization, Dashboard Development, AI-Assisted Analysis (Microsoft Copilot, ChatGPT, Indigo AI)
- **Automation & Systems:** Power Automate, VBA/Excel Macros, Python, SAP, Process Automation & Improvement
- **Business:** Purchasing/Procurement, Supply Chain Analytics, Inventory Management, Cross-Functional Collaboration

EXPERIENCE:

Flowserve Corporation — Kalamazoo, MI
Supply Chain Intern — August 2026 – Present

- Co-developed an AI-enabled SAP requisition automation workflow using Python, Indigo AI, Power Automate, and batch scripting, saving **75 minutes daily** and reducing manual procurement effort.
- Rebuilt and enhanced an **Excel VBA reporting solution** used by purchasing teams, improving access to critical procurement data and increasing reporting efficiency.
- Created **Interactive Procurement Analytics Dashboards** tracking supplier and procurement KPIs, enabling faster identification of purchasing trends and operational bottlenecks.
- Analyzed **SAP and Excel purchasing data** to support PO management, process improvements, and data-driven supply chain decisions.

WMU Student Center — Kalamazoo, MI
Administrative Office Assistant & Information Center Associate — October 2025 – May 2026

- Managed confidential databases for **500+ students**, ensuring accuracy via validation and quality control.
- Analyzed operational logs and visitor inquiry trends to improve workflow efficiency.
- Coordinated logistics and cross-departmental communication for **40+ weekly campus events**.

RELEVANT COURSEWORK & ACADEMIC PROJECTS:

CSBS Community Bank Case Study Competition – Top 15 Teams Nationally | (GitHub)

- Analyzed financial statements, net interest margin trends, and loan concentration using UBPR and Call Report datasets.
- Delivered PowerPoint recommendations to a CEO/CFO panel; selected among Top 15 of 35 teams from 28 universities.

Supply Chain Data Analysis & Hypothesis Testing (Python, Statistical Analysis) | (GitHub)

- Analyzed 180K+ supply chain records in Python to identify delivery performance trends and operational inefficiencies.
- Applied hypothesis testing and visualization to uncover significant late-delivery patterns and recommend process improvements.

Walmart Weekly Sales Forecast (Python, Power BI) | (GitHub)

- Built a Prophet demand forecasting model on Walmart sales data to predict weekly demand trends.
- Created an interactive Power BI dashboard for inventory planning and staffing decisions, enabling cost efficiency.

LEADERSHIP & PROFESSIONAL ENGAGEMENT

WMU Business Analytics Network (BTN): Applied Excel and Power BI through analytics workshops and projects; strengthened dashboard development and visualization skills.
